Summary

Software Engineer with 4.5 years of experience building scalable, high-performance web applications using **React**, **Angular**, **JavaScript**, and **TypeScript**. Experienced in designing modular frontend architectures, building secure REST APIs, optimizing performance for data-intensive systems, and delivering production-grade software in Agile environments. Strong problem-solver with hands-on experience in troubleshooting complex production systems and improving reliability at scale.

Skills

Frontend: React.js, Angular (10+), JavaScript (ES6+), TypeScript, Redux, Zustand, Context API, HTML5, CSS3, TailwindCSS, Responsive Design, Accessibility (WCAG), i18n

Backend & APIs: Node.js, Express, Python, RESTful API Design, Authentication (JWT-based), Microservices

Data & Cloud: PostgreSQL, Azure, Distributed Data Workflows

DevOps & Tooling: Git, GitHub, GitHub Actions (CI/CD), Jenkins (familiarity), Docker (basic), Postman

Engineering Practices: Component Architecture, Separation of Concerns, Performance Optimization, Secure Coding Practices, Code Reviews, Agile/Scrum

Work Experience

Senior Software Engineer | Wipro | Jul 2021 – Present | Bengaluru, IN

- Designed and scaled **React & Angular** single-page applications powering high-usage, data-intensive dashboards and automation platforms.
- Architected reusable **TypeScript**-based component systems to improve maintainability, consistency, and feature velocity.
- Improved UI **performance** by 25% through lazy loading, memoization, efficient state management, and API optimization.
- Integrated complex RESTful services handling real-time data flows and asynchronous workflows.
- Built and maintained secure REST APIs using Node.js with structured validation and authentication logic.
- Developed Python-based services for telemetry decoding, validation, and automation workflows.
- Automated onboarding of 6,000+ IoT devices, reducing manual effort by 80% and improving operational reliability.
- Contributed to frontend architectural decisions emphasizing modular design, scalability, and performance best practices.
- Diagnosed and resolved complex production issues through log analysis, state-flow tracing, and service-layer debugging.
- Collaborated with Product, Backend, QA, and DevOps teams to deliver production-ready features under tight sprint timelines.
- Strengthened CI/CD workflows using GitHub Actions and participated in peer code reviews to maintain high engineering standards.

Projects

Smart UX Assistant (Next.js, React, OpenAI API, TailwindCSS, TypeScript) | [GitHub](#) | [Live Demo](#)

- Built full-stack AI UX text generator using Next.js and OpenAI APIs with refinement and translation.
- Designed pixel-accurate, responsive dark-mode UI with modular components, loaders, auto-scroll, and mobile history.
- Implemented secure server routes with rate limiting, safe JSON parsing, and reusable client hooks.

MiniSpotify (React, TailwindCSS, Zustand, Spotify Web API) | [GitHub](#) | [Live Demo](#)

- Developed a **Spotify-inspired music dashboard** with secure **OAuth 2.0 + PKCE authentication**, real-time playlist browsing, and playback preview.
- Implemented **Zustand** for lightweight and performant global **state management**.
- Designed responsive UI with **TailwindCSS** and seamless routing with **React Router**.

Weather App (React, OpenWeather API) | [GitHub](#) | [Live Demo](#)

- Built a **responsive weather dashboard** with real-time forecast and location-based search.
- Integrated OpenWeather API and deployed via **GitHub Pages** for public access.

Education

Swami Vivekananda Institute of Modern Studies

Bachelor of Computer Applications, 8.87

Jun 2018 – July 2021

Barrackpore, Kolkata, WB

Certifications

- Microsoft Certified: Azure Data Fundamentals (DP-900)
